DETAILED ACTION

Specification

1. The Applicant is requested to amend the status of the parent Application, i.e., "now US Patent No. 6,644,147".

Claim Objections

2. Claims 6, 7, 12 and 13 are objected to because of the following informalities: claims 6 and 7 both depend from claim 4 and recite the same limitations making them duplicates. Same rejection applies to claims 12 and 13 both of which depend on 10.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claims 2 and 8, lines 8-9, renders the claims indefinite because a first through hole (13) is already recited earlier in line 3 and another through hole as recited again renders the claims indefinite. 112 1st paragraph is not applied since the deficiencies appear to be of clarity rather than enablement. The scope of claims is unascertainable.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chiang (6,250,183).

Art Unit: 3723

Chiang discloses all of the limitations of claim 1, i.e., an operating device for a screwdriver including a body (20); a barrel (30) extending through the body and pivotally partially received in the body, the barrel having a polygonal hole (31) centrally defined therein, the polygonal hole adapted to partially receive a tip (60); and a controller (70) mounted to the body for controlling an operate direction of the screwdriver; wherein the polygonal hole extending through the barrel.

Conclusion

8. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Shiao, Liao, Chou, and Shiao are cited to show related inventions.
